

ADISION ADVERTISING PRICING MODEL

WhatsApp-first customer acquisition and advertising for Nigerian businesses.

THE PROBLEM

Businesses can spend ■100k–■300k on adverts and still struggle to know what actually produced customers.

THE ADISION APPROACH

Choose whether you want reach, qualified signups, or paying customers — then fund the campaign upfront and track delivery.

STARTER

■5,750

Reach & visibility

- 14-day advertising campaign
- Distribution across a defined number of relevant WhatsApp groups/channels
- 1 bonus advertising day
- Campaign tracking and basic performance reporting
- Best for businesses testing Adision and building awareness

CORPORATE

■350 / qualified signup

Acquire new users

- Advertiser chooses the number of qualified signups required
- Example: 50 signups × ■350 = ■17,500
- Campaign is funded upfront
- Only verified new users attributed to the campaign count
- Unused campaign balance remains available after delivery

GOLD SALESMAN

■500 / qualified paying customer

Acquire paying customers

- Advertiser chooses the target number of paying customers
- Example: 20 customers × ■500 = ■10,000
- Campaign is funded upfront into the campaign balance
- A customer counts only after campaign-attributed signup + qualifying purchase/deposit
- Unused balance is not consumed when a target is not reached

HOW THE PREPAID MODEL WORKS

Advertisers fund the maximum campaign value before Adision begins delivery. This protects both sides and makes campaign consumption transparent.

#	STEP	WHAT HAPPENS
1	Choose a plan	Select Starter, Corporate, or Gold Salesman based on the outcome you want.
2	Set a target	For Corporate or Gold Salesman, choose the number of qualified users/customers.
3	Fund the campaign	Deposit the full campaign value into the Adision campaign balance.
4	Adision distributes	Your campaign is delivered through the Adision WhatsApp-first publisher network.
5	Track results	Attribution records campaign activity, signups and qualifying actions.
6	Balance is consumed	Only qualifying delivered results consume the applicable per-result amount.

EXAMPLE: GOLD SALESMAN

Target	Rate	Maximum campaign funding
20 paying customers	■500 each	■10,000
13 customers achieved	13 × ■500	■6,500 consumed
Remaining balance	—	■3,500 remains

WHAT COUNTS AS A QUALIFIED CUSTOMER?

For Gold Salesman, a user must be attributable to the advertiser's Adision campaign, create a new account with the advertiser, and complete the advertiser's defined qualifying purchase or deposit. This prevents simple clicks or inactive registrations from being counted as paying customers.

Important: Adision provides acquisition and attribution. The advertiser remains responsible for its offer, onboarding, customer support, retention and reactivation after acquisition.

THE THREE OUTCOMES

STARTER	CORPORATE	GOLD SALESMAN
I want reach.	I want new users.	I want paying customers.
Fixed campaign fee	■350 / qualified signup	■500 / qualified paying customer

Adision — a WhatsApp-first advertising network designed to make customer acquisition more measurable.
